plateforme innovatrice et propriétaire qui simplifie l'execution d'infrastructure energetique par le logiciel et la quincallerie

Una plataforma patentada e innovadora para simplificar la ejecución de la infraestructura energética a través de software y quincallero

There are two products: electric energy and transport.

Electric energy
(produced at a
place and time)

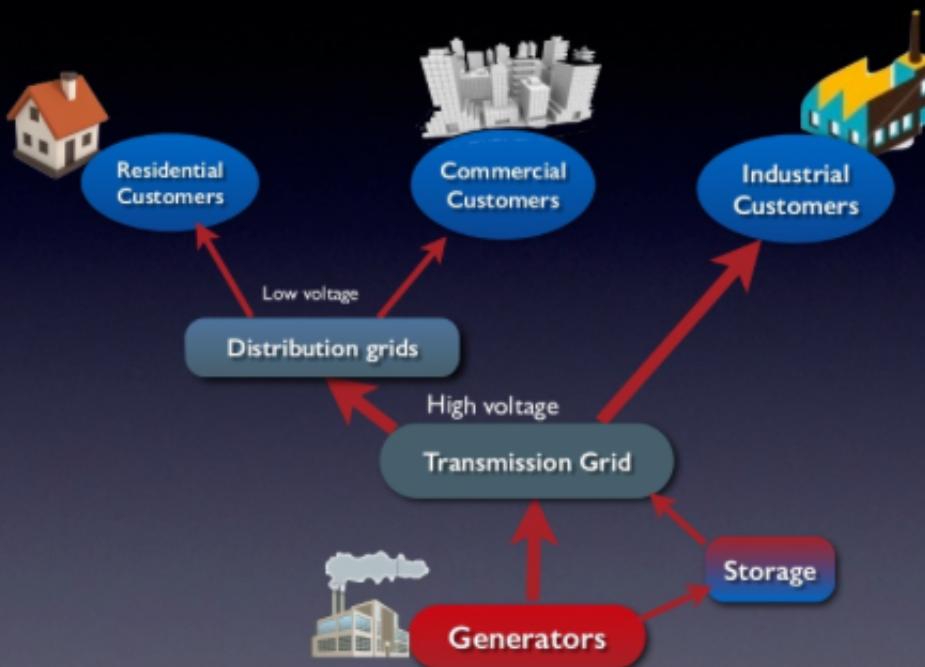

Transport

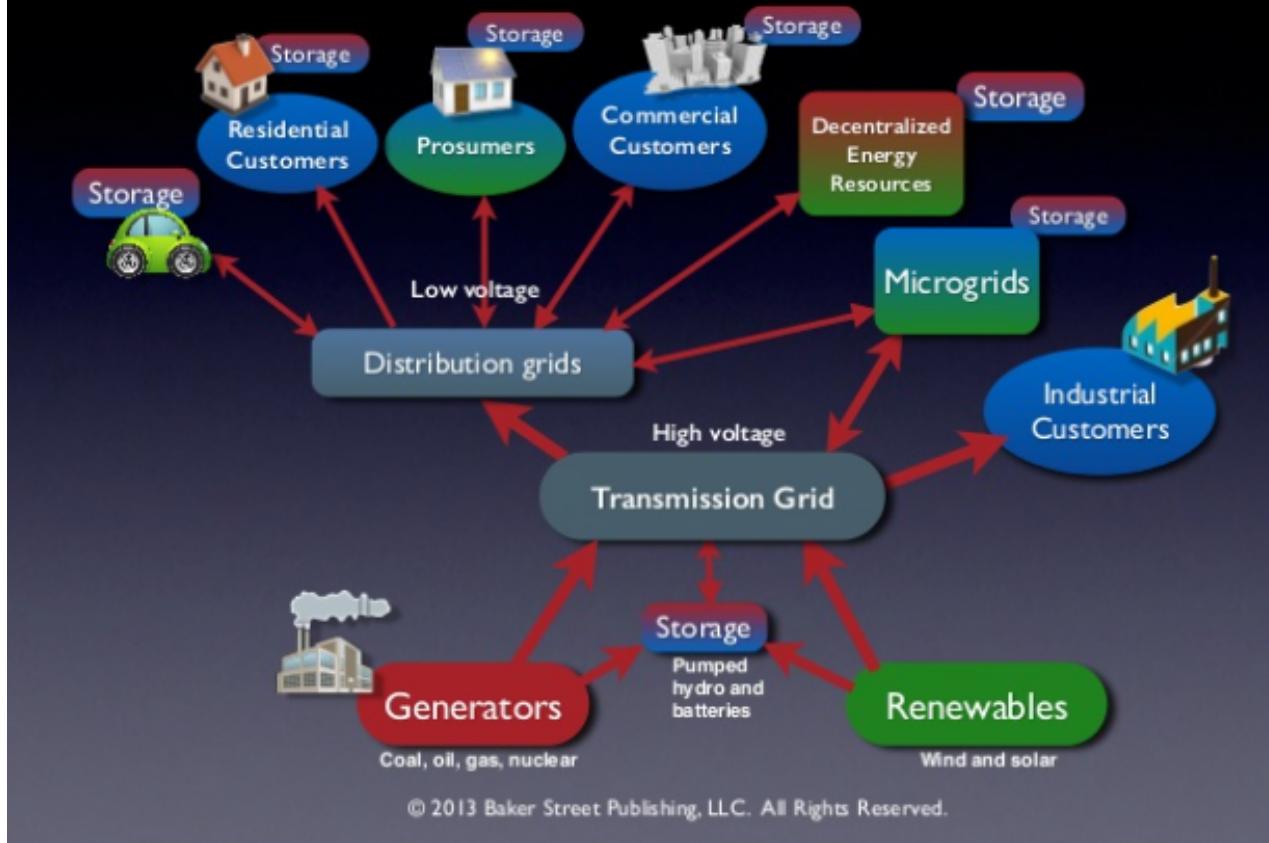

Electric energy
(delivered at a
different place
and same time)

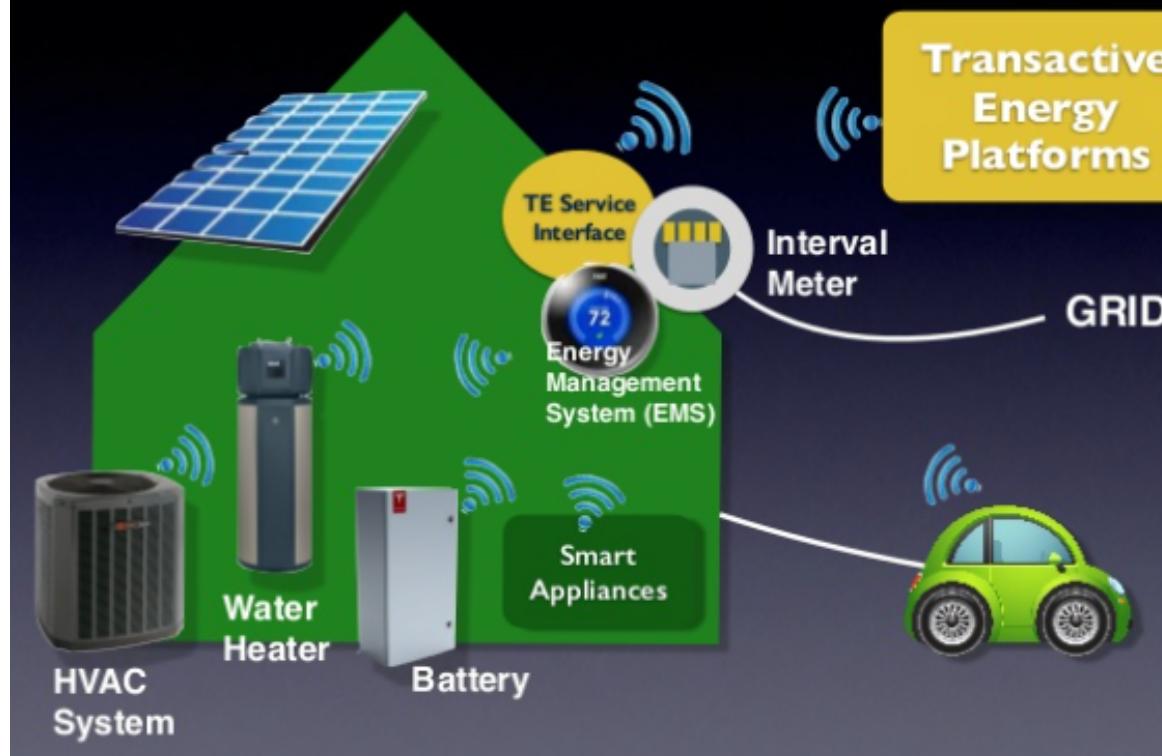

This is how the electric energy system looked in the year 2000.

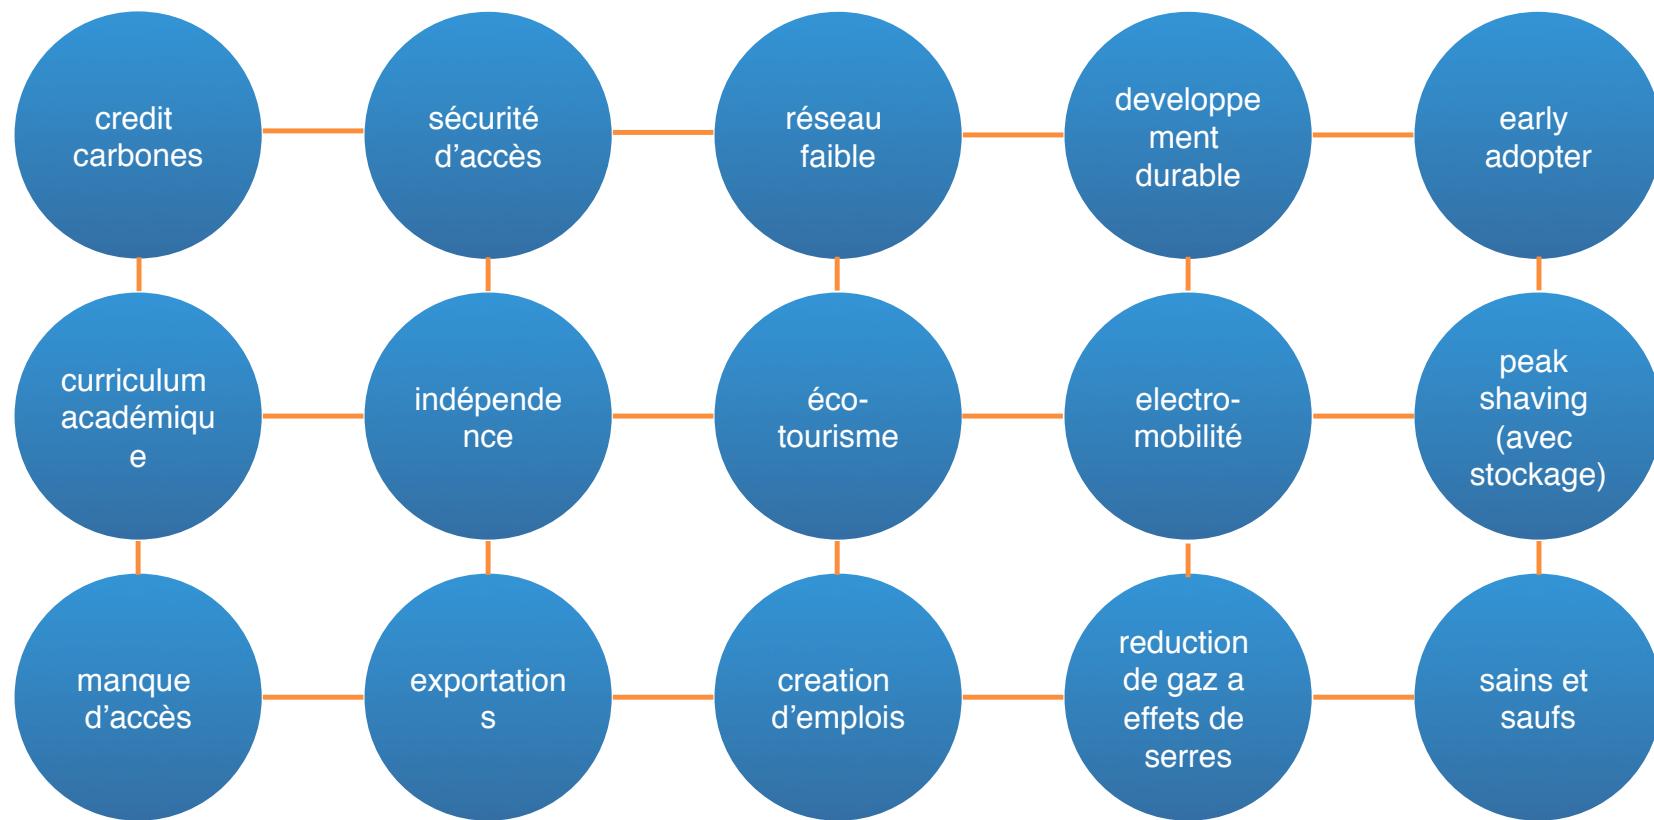

This is how the electrical system will look in the year 2020.

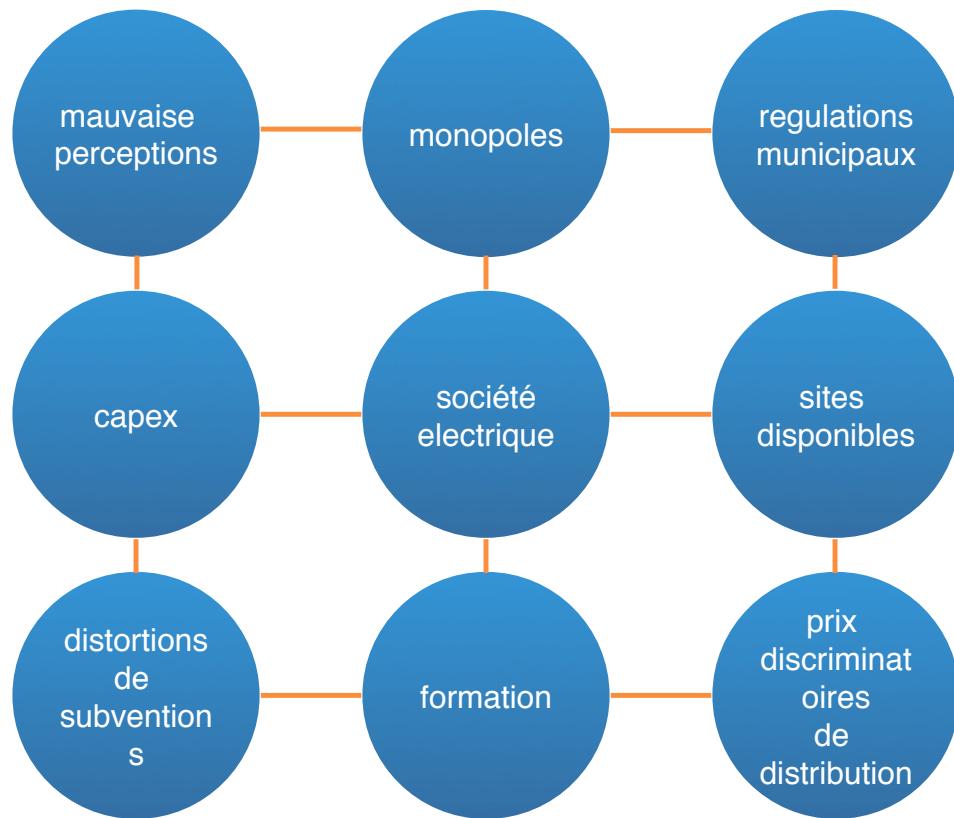

A fully-equipped home looks like this in the Transactive Energy model.
